Feng Shui Lighting Announces Partnership with TLS International

Bringing Backlighting to the Forefront of Design

Lansdale, PA – April 28, 2015 — Feng Shui Lighting, Inc. revealed their new partnership with TLS International of Montreal. As the official partner in the architectural lighting market in the United States of America, Feng Shui Lighting now offers a revolutionary patented product for backlighting with their NetLight powered by TLS.

The NetLight powered by TLS allows designers to evenly illuminate walls, columns, stretch ceilings, and more. Size is no longer a limitation designers face when backlighting. The NetLight powered by TLS is available in three color temperatures (3000K, 4100K, and 5400K) with an approximate wattage of 7Watts per square foot for the Premium and 4Watts per square foot with the Standard. An RGBW version allows for color changing LED backlighting for ceilings and walls.

Designers have the opportunity to learn more about the product line and visit the team at their booth (#4302) at Lightfair International's Trade Show (May 5-7, 2015) at the Javits Center in New York, NY.
